[Are Renzi's reforms running out of steam?](#)

C. Bastasin, "The risk of a sudden bank run is underestimated in Athens as well as in Brussels"

The graph (see attachment) below shows the development of the Greek real GDP since the launch of the euro, relative to the real GDP of the euro-area...

Working Papers

S.Micossi, "The monetary policy of the European Central Bank"

This paper examines the policies pursued by the European Central Bank (ECB) since the inception of the euro. The ECB was originally set up to pursue price stability, with an eye also to economic growth and financial stability as subsidiary goals, once the primary goal was secured.

P.Benigno, S.Nisticò, "Non-Neutrality of Open-Market Operations"

Unconventional monetary policy can have consequences for inflation and output because of income losses on central-bank balance sheet.

C. Giannetti, "Debt concentration of European Firms"

This paper investigates the level of debt specialization across European firms relying on a cross-country comparable sample of manufacturing firms. We find that a number of firm characteristics – such as firm size and age – help predict the firm composition of the various types of debts (i.e. debt specialization) but not the level of each debt share...
